ET  
BAL THAZAR LAKEMAN.  
MDCCXXVII.

PLANTARVM EXPLICATIO.

T A B. XIII.

- Fig. 1. Fungoides, fuscum, acetabuli forma, externe ramificatum. Sive Fungoides maximum, pyxidatum.  
Fig. 2. Fungoides, nigricans, majus cornucopiae forma, externe spectatum a latere.  
Fig. 3. Idem superne vifum.  
Fig. 4. Fungus minor, pilei superficie flocculis fuscis villosa. a latere vifus.  
Fig. 5. Idem ab inferiori parte spectatus oblique.  
Fig. 6. Idem verticaliter sectus bifarium, plano transeunte per media pilei & pedunculi: ut caro, lamellae, hirti aculeati flocculi, pedunculi plenitudo, cernantur.  
Fig. 7. Fungus gelatinus; flavus, spectatus a parte inferiore, maturus.  
Fig. 8. Idem, erectus, a latere spectatus.  
Fig. 9. Idem erectus, defuper vifus.  
Fig. 10. Fungus, minor, totus rufus. defuper vifus, naturali magnitudine.  
Fig. 11. Idem a parte inferiori spectatus.  
Fig. 12. Idem verticaliter bifarium sectus, ut sectio pedunculum transeat.  
Fig. 13. Fungoides, qui Fungus minimus, scutellatus, coloris aurantii. Raj. Synopf. XVII. N. 26.  
Fig. 14. Idem diversis nascondi temporibus spectatum, superne, inferne, juxta literas a. b. c. d. e.
